Protocol Implementation and Schedule

Protocol Problems:

There were not protocol implementation problems.

Schedule Problems:

We have completed all climate and vegetation sampling scheduled up to date. The vegetation data from December was submitted as well in the new data entry form version 1.5.

On November was carried out the maintenance of the weather station and the The precipitation sensor (rain gage) was replaced.

On December, the calibration and census was carried out on the 1 ha plot located at 200 masl.

Logistical or Equipment Problems

Logistical Problems:

There were not logistical and equipment problems.

Personnel Changes

Personnel Changes:

There were not personal changes this period, but we have two field assistants for vegetation censuses. Their names are Juan Gabriel Huertas and Wagner Corella.
