

Yasuni (07.01.2015 to 09.30.2015)

Year:

2015

Quarter:

July - September

Protocol Activities:

Fieldwork of Fauna and Flora were terminated by the second quarter.

In this quarter we submitted data on Flora. We also finalized processing pictures of camera traps. However, we are having problems with the TPK of array 2 which was not possible to open once we uploaded it on Dropbox. We are currently working with Jimmy McCarthy to have this problem solved.

Clima data is updated until october 2nd; no clima data have been lost within the first three quarters of this year.

Protocol Problems:

We are currently trying to solve a problem with the TPKof array 2 that is not possible to read.

Schedule Problems:

We have intended to retrieve climatic data on a monthly basis, however, we have not been able to do so. We hope to improve this schedule problem for the next year.
